

BUILDERMT'S CLIENT ADVISORY GROUPS DIRECT 100% OF BUILDERMT'S WORKFLOW MANAGEMENT SUITE TECHNOLOGY DEVELOPMENT

**Development of All of BuilderMT's Recent Modules and Functionality Has Been
Requested by BuilderMT's Own User Base**

Denver — September 29, 2015 —BuilderMT, the widely-acknowledged market share leader in workflow management solutions for mid-market home builders, today announced that 100% of the Company's technology development for new modules and functionality is being guided by Client Advisory Groups drawn from BuilderMT's user base.

"BuilderMT implemented this Client Advisory Group process not just to solicit our opinions about development, but to actually give us a direct say in what functionality BuilderMT will next develop for its users," said Stacie Gratz, Business Technology Manager for Allen Edwin Homes. "We really feel as though the development of BuilderMT is a collaborative process that directly involves the BuilderMT user base, and it's a great feeling to know we are in such control of the software we use today...and the software we will use in the future."

"Our Client Advisory Groups are entirely unique to home building software," said Ward Griffith, BuilderMT's National Sales Manager. "BuilderMT meets regularly with our Client Advisory Groups, and we get consensus on where to direct our coding and development resources. Essentially, all technology developments in BuilderMT are being voted for, designed and directed by our own users."

Currently, BuilderMT has Client Advisory Groups in the following areas:

- Estimating and Database Management
- Bidding and Purchasing
- Sales Pricing and Sales Center Integration
- Scheduling and Multi-Unit Scheduling
- Portal Technologies and BMT Cloud
- Accounting Integrations
- Warranty Integrations

“Recent BuilderMT functionality that has resulted from Client Advisory Groups includes BuilderMT’s most-popular modules, such as Multi-Family Scheduling, the Variance Purchase Order Process in the Builder Portal, and BuilderMT’s enhanced Tablet and iPad experience,” commented Tom Gebes, BuilderMT’s President. “We know of no other company that involves its user base so closely in technology development decisions.”

About BuilderMT

For the home building industry at large, BuilderMT (a MiTek company) provides highly-customizable workflow and building-process-management software that works in tandem with leading accounting systems and other wireless and jobsite productivity tools, such as CRM and warranty management. For 20 years, BuilderMT systems have been purchased by more than 1,000 home builders and cumulatively used as a desktop workflow tool by upwards of 10,000 home building professionals. BuilderMT is widely recognized as a leader in process-driven, best-building-practices for home builders, as well as customer service, warranty applications, online training and innovative wireless applications.
