

SETTING RECORD ADOPTION RATES, BUILDERMT'S BUILDER PORTAL™ DRAWS HOME BUILDERS BY THE THOUSANDS

**So Far in 2016, Builder Portal™ Has Seen 3,340 New Unique Users Accessing
“Role-Based” Productivity Solutions**

Denver — April 7, 2016 — BuilderMT – the widely acknowledged market share leader in workflow management - today announced that adoption rates of its Cloud-based Builder Portal™ are easily on pace to set a record for rapid adoption by home builders.

So far in 2016, 3,340 users have logged on to the Builder Portal™. In March 2016 alone, the number of unique users exceeded 2,600. This is by far the fastest rate of technology adoption by home builders of any workflow solutions, including BuilderMT and all of its competitors. (Watch a five-minute demo: <http://buildermt.com/index.php/buildermt-presentations/builder-portal-demo/>)

“With the use of BuilderMT WMS and the Builder Portal, it has helped us efficiently bridge the gap between the office, field, and suppliers,” said Joey Rolon, Director of Information Systems, Robuck Homes. “With everyone being on the same page, using the same tools, it greatly impacts the success of each and every job.”

BuilderMT's Builder Portal combines the features and functions of BuilderMT's successful Superintendent Portal and Trade Portal into one platform. Using a “role-based” solution set, users access BuilderMT through any browser or mobile device.

Builder Portal provides access to BuilderMT WMS Purchasing and Scheduling, while allowing field review of construction documents. It also integrates with Bid Management, allowing trade contractors, vendors, and suppliers to review bid details from the builder, including the ability to enter bid items and submit bids to the BuilderMT WMS Bid Management Dashboard. Builder Portal can also track purchase orders, schedules, approvals, payments and much more for subs, vendors and material providers.

The Builder Portal platform is a pure SaaS hosted offering; there are no servers to buy or software to install. BuilderMT designed Builder Portal to run on Microsoft's Azure public cloud, making it robust, fault-tolerant and infinitely scalable. By utilizing Microsoft Azure, BuilderMT can deliver software faster and be more responsive to its home builder user base, no matter where on the globe they are working.

“We have never seen such rapid adoption of any technology. The adoption has blown away our most-ambitious projections,” said Tom Gebes, President of BuilderMT and Sales Simplicity. “Because Builder Portal is the result of user-directed development, our hats are off to our users, who helped us develop the very solutions they are using today.”

About BuilderMT

For the home building industry at large, BuilderMT (a MiTek company) provides highly-customizable workflow and building-process-management software that works in tandem with leading accounting systems and other wireless and jobsite productivity tools, such as CRM and warranty management. For 20 years, BuilderMT systems have been purchased by more than 1,000 home builders and cumulatively used as a desktop workflow tool by upwards of 10,000 home building professionals. BuilderMT is widely recognized as a leader in process-driven, best-building-practices for home builders, as well as customer service, warranty applications, online training and innovative wireless applications.
